RESEARCH EXPERIENCE

National University of Singapore, supervisor: Professor [Bryan Hooi](#) Jan 2021 – Mar 2022

- Built and released one thousand graph-based traffic accident benchmark datasets (TAB-1k) for accident prediction problems.
- Proposed a novel Graph Neural Network architecture (TRAVEL) to capture angular and directional information from road networks.
- Evaluated the proposed TRAVEL framework against state-of-the-art machine learning approaches.
- Achieved the best performance on the real-world benchmark datasets.

Central South University, supervisor: Professor [Anfeng Liu](#) Mar 2018 – Apr 2019

- Modeled a vehicular network consisting of sensors, vehicles, and data centers.
- Improved the efficiency of data collection in smart cities by deploying data centers using the bisecting K-means algorithm.
- Analyzed and tested the proposed deployment schemes on more than 25 million records of real-world trajectory data.

Central South University, supervisor: Professor [Anfeng Liu](#) Feb 2017 – Mar 2018

- Simulated a scenario of Information-Centric Networking (ICN).
- Developed two algorithms to improve the routing and replacement of data packets.
- Achieved improvements in terms of delay, cache hits, and network traffic.

PROJECT EXPERIENCE

Online Course Platform [\[Code\]](#)

- Created an online course website with Spring Cloud.
- Applied Apache FreeMarker to accelerate development by generating code for similar services.
- Implemented API of ApsaraVideo for VOD provided by Alibaba Cloud to encrypt and authorize course videos.
- Designed and developed web pages using Vue and Bootstrap.

SKILLS

- Programming Languages: Java, Python, HTML/CSS
- Frameworks: PyTorch, PyG, MyBatis, Spring Boot, Vue
- Miscellaneous: Linux, MySQL, Hadoop, Hive, Git, Maven
